Balancing messages

AGGM PLATFORM

General Information

▶ AGGM transmits balancing messages to BGRs.

▶ During the registration, a BGR can specify, whether he wants to receive the balancing messages via AS4 or WEB.

▶ The AS4 connection is set up directly with GCA (commercial.dispatching@gasconnect.at). The sample messages for this are published on the AGGM website.

▶ The balancing messages via web are published on the AGGM platform.

▶ Two message types are provided depending on the BGR activity: the BG status for BGRs without end consumer supply and the allocation status for BGRs with end consumer supply.

BG-Status

Login Area

▶ In the login area under Admin Area >BG-Status the balancing messages of the last three months are published. Here you can also filter by a time period or search directly for a term.
