Dashboard

AGGM Platform

General information

▶ AGGM offers a dashboard for users in the login area on the AGGM platform. Depending on the role of the user, different widgets can be selected.

▶ The dashboard offers the following functions:

  ▶ add new widgets

  ▶ remove widgets

  ▶ show more details

  ▶ move widgets

Widget configuration

▶ The "Add Widget" button opens a dialog box and the widget can be selected according to the role and added to your own dashboard.

▶ The widgets are used to:

  ▶ display selected time series

  ▶ to create an overview of balance groups and their child elements

  ▶ Download of selected XML-files

▶ Any number of widgets can be added. A delete function allows you to remove selected widgets.

Add new widgets

▶ The "Add widget" button can be used to create a new widget.

▶ After clicking this button, the "Add widget" menu opens. In this menu it is possible to select different types of widgets.
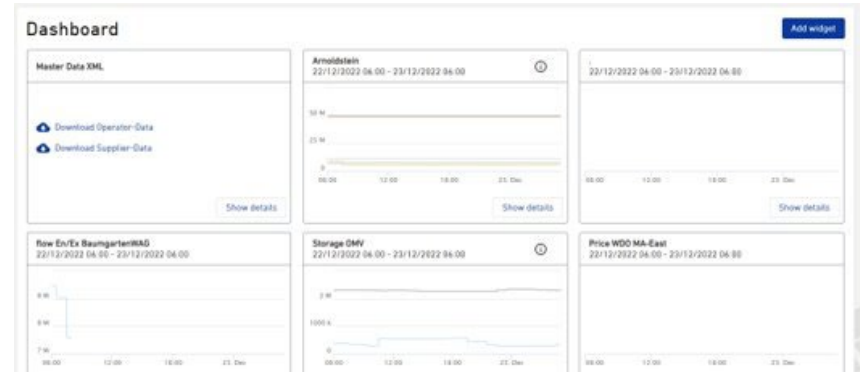

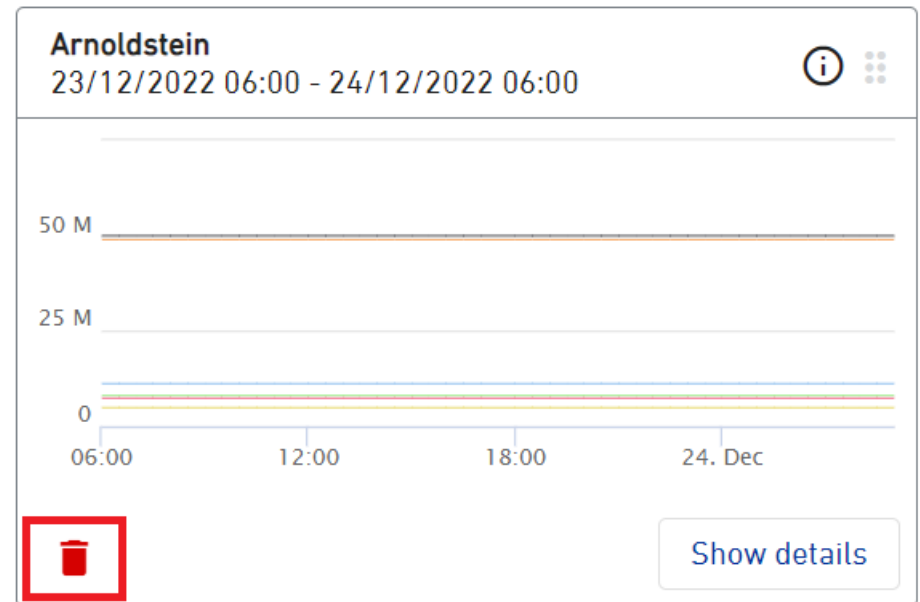

Remove widgets

▶ The red dustbin button enables the user to remove added widgets.

▶ After clicking this button, the selected widget is removed.

Show more details

▶ The "i" button enables the user to get more information on the current widget.

▶ This feature is only available for the E/X Point widget.
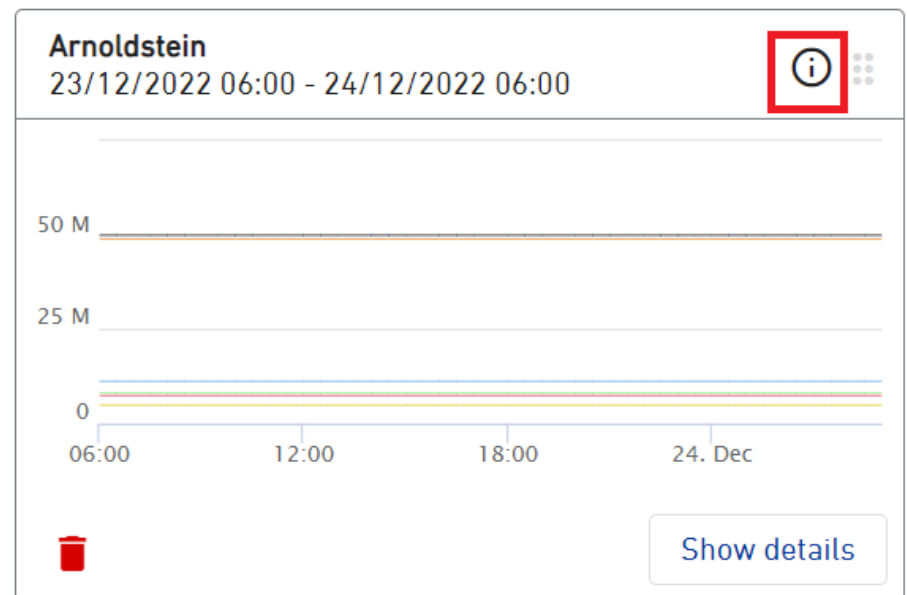

Move widgets

▶ With the "six point" button it is possible to move the widget around.

▶ It is possible to exchange positions between each individual widget with this feature.
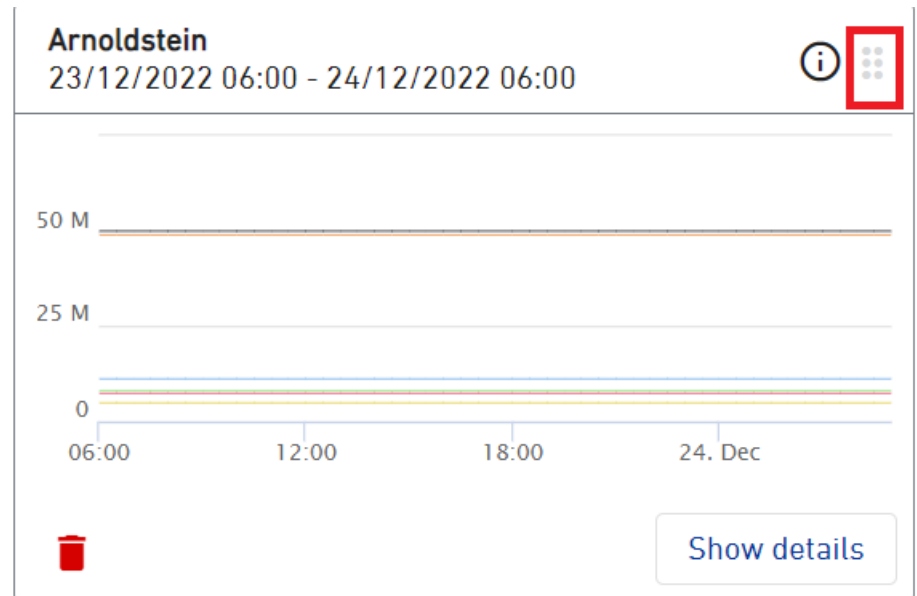

What widgets are available?

Not all widgets are available to all users. The table below shows which widgets are available to which users.

Widget	BGR	supplier	distribution system operator
E/X-Point	X	X	X
Timeseries	X	X	X
Master Data XML			X
BG-Administration	X		

Timeseries widget

▶ This widget is used to display a time series from the data monitor on the current gas day.

▶ The same time series from the data monitor are offered for selection

▶ This widget is available for all users in the login area.

▶ With the "Show details" button you can navigate directly to the data monitor.

flow En/Ex BaumgartenWAG
21/12/2022 06:00 - 22/12/2022 06:00

Show details
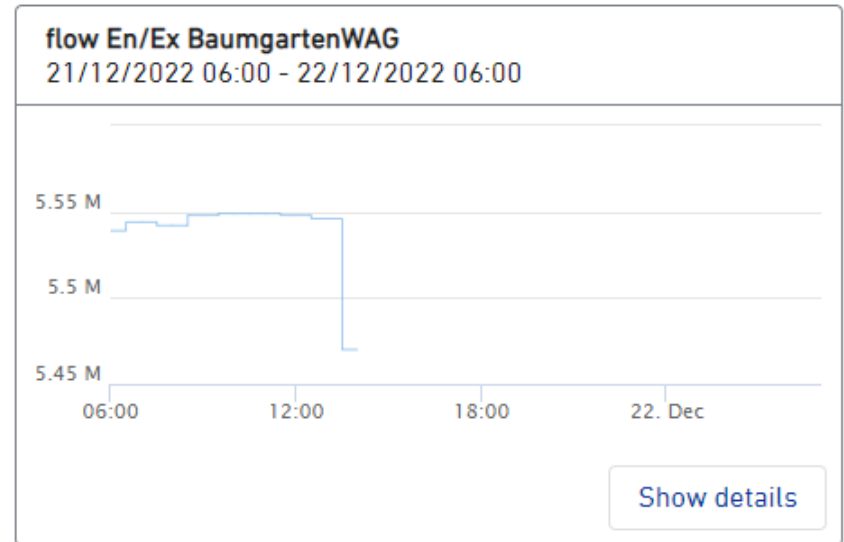

E/X-Point widget

▶ This widget displays the timeseries of an Entry/Exit point of the Austrian map on the currant gas day.

▶ When selecting the widget, the E/X point, as well as the timeseries (Allocation, Capacity booked, Capacity nomination, Capacity renomination, Physical flow) can be selected via checkbox.

▶ This widget is available for all users in the login area.

▶ With "Show details" you can navigate directly to the data monitor.

BG-administration widget
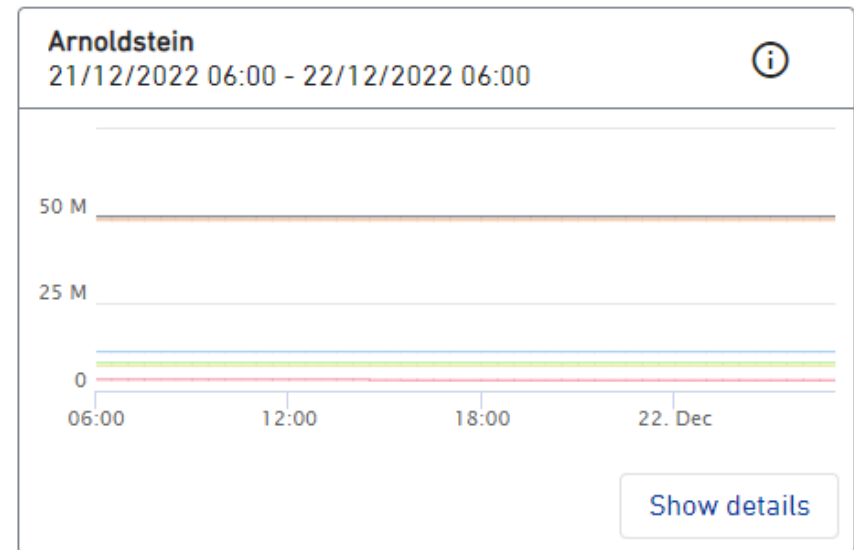

▶ This widget is used to provide an overview of the balance group portfolio.

▶ The Y-code and the validity of the balance groups are displayed.

▶ This widget displays the number of balance group members and supplier accounts.

▶ With "Show details" you can navigate directly to the BG-Administration and BG-Assignment.

▶ This module is only available to balance group responsible parties.

BG
Validity: 01/01/4000 - 31/12/4000

BG-Member: 1   Show details

SA: 0   Show details

Master data XML widget

▶ This widget offers the direct download of master data XML.

▶ With "Show details" it is possible to navigate directly to the Operator interface.

▶ This widget is only available for network operators.
