Austrian Gas Grid Management AG

2024 Manual

AGGM Data Monitor & API-Token

AGGM Platform

Data Publication

General information

- ▶ The [AGGM Data Map](#) provides a quick overview of the current situation in the Austrian gas market.
- ▶ The [AGGM Data Monitor](#) offers comprehensive and detailed data on the Austrian natural gas situation, including storage information of neighboring countries.
- ▶ AGGM provides an API for the retrieval of Market Area Data (MA-Data) and Balance Group Data (BG-Data) (GMMO-VO 2020 §34 (2)).

Data Publication

AGGM Data Map

- ▶ Period: the current hour per default
- ▶ Time series groups: Allocation, booked / nomination / renomination / technical capacity, physical flow

- ▶ Icons
 -  Entry & Exit
 -  Exit
 -  Entry
 -  Biomethan Production
 -  Production System Operator
 -  Storage System Operator

-  Supply of Consumers
-  Virtual Trading Point

- ▶ The names of the storage and production operators are the respective company names

- ▶ Export
 - 
 - Download PNG
 - Download JPG
 - Download SVG

Data Publication

Physical Flow

- ▶ Are always in both directions - entry and exit on the same time series. Minus values are exits from the market area and plus values are entries into the market area.

Data Publication

AGGM Data Monitor

The screenshot shows the AGGM Data Monitor interface. A central message reads "No Filters Set" with a funnel icon and the text "You have not selected any time series yet! Please provide at least one time series and a date range." To the right, a "Filters" panel is open, containing several sections:

- Granularity:** Buttons for "Hours", "Days", "Months", and "Years".
- Date range:** A dropdown menu set to "Custom range".
- Start date:** Input field with "05/12/2023" and a calendar icon.
- Time:** Input field with "06:00" and a dropdown arrow.
- End date:** Input field with "06/03/2024" and a calendar icon.
- Time:** Input field with "06:00" and a dropdown arrow.
- Choose timeseries *:** An empty text input field.
- Filter timeseries:** A dropdown menu set to "Current".
- Buttons:** "Apply" and "Reset" buttons at the bottom.

Numbered callouts (1-6) are placed over the interface:

- 1:** Points to the "Data Monitor" header.
- 2:** Points to the "Select favorite" button.
- 3:** Points to the "Date range" dropdown.
- 4:** Points to the "Choose timeseries *" input field.
- 5:** Points to the "Filter timeseries" dropdown.
- 6:** Points to the "Apply" button.

On the next slides you will find explanations on how to use the AGGM Data Monitor!

2 Granularity & 3 Date range

▸ Granularity

the original values apply in every single hour

- Granularity: Hours, Days, Months, Years
- For units with [/h], the average value per hour in the selected period is given.
- For other units, the hourly values are totaled over the selected period.

▸ Date range

- Standard: range type „custom range“, 3 months, basis gas day
- Range type: dropdown opens with predefined time ranges (last, current, next time period).
- When selected, this selection is applied to the calendar.

Select time series

Choose timeseries *

This field is required.

- ▶ Without selecting a filter for one of the available groupings (see next slide), all time series are displayed and can be chosen.
- ▶ The field has a search function that can be used to search for time series names.
- ▶ Multiple time series can be selected. To close the scroll box, click outside the box.
- ▶ **Tip: Setting a filter facilitates the search for time series.**

Storage

- ▶ The ArchiveFunction filter is set to "Current" by default and displays only currently valid data. Expired data has the valid-to date added in the time series name and can be activated via the "Historical" box.
- ▶ When you click in one of the filters, the characteristics open and can be selected.
- ▶ The time series to be selected in the dialog box change according to the selected filter.

Data Publication

5 Explanation Filter Archive Function

Archive Function 	
Current	Current time series
Historical	Historical time series; not applicable due to the last market model change in 2022

Data Publication

5 Explanation Filter Balancing

Balancing 	
Balancing Energy	Balancing Energy (BE) quantities purchase and sale per Market Area (MA)
BG-Status	All data on Balance Group (BG) status / not accessible in the public area
Linepack	Time series on linepack and utilisation (e.g. expected/utilised linepack, maximum/minimum linepack)
Prices	BE prices, Reference price virtual trading point (VTP), Withinday Obligation (WDO), neutrality charge

Data Publication

5 Explanation Filter Capacities

Capacities	
AvailableFZK	Available freely allocable capacities
AvailableUK	Available interruptible capacities
Booked	Sold capacities
Booked yearly	Annual sold capacities
BookedFZK	Sold freely allocable capacities
BookedUK	Sold interruptible capacities
Technical capacity	Technical capacity (TC) - reduced capacities, e.g. due to maintenance work, are published here
Technical capacity yearly	Annual technical capacity (TKY)

Data Publication

5 Explanation Filter CapacityUtilization

CapacityUtilization	
Allocation	A detailed explanation can be found here
Interruption	Difference of the actual and nominated quantity
Nominated	Quantity at Entry/Exit transmission system operator (TSO) or virtual trading point (VTP)
Renominated	Quantity correction of renomination cycles
PhysicalFlow	Actual measured physical flow
UK fulfillment	Degree of fulfillment of Interruptible capacities (UK) in percent

Data Publication

5 Explanation Filter Consumption

Consumption	
<300MW	Total of load profile-measured customers with a connected load of less than 300 MW
>300MW	Total of load profile-measured customers with connected load greater than 300 MW
EndConsumer	Data of the calculated end consumer (improved quality over time); allocations end consumer
MarketVolume	Allocations at all Entry/Exit without the virtual trading point (VTP)
PowerPlant	Gas-fuelled power plants
SLP	Total of end consumers with a standardised load profile

Data Publication

5 Explanation Filter EntryExitPoint

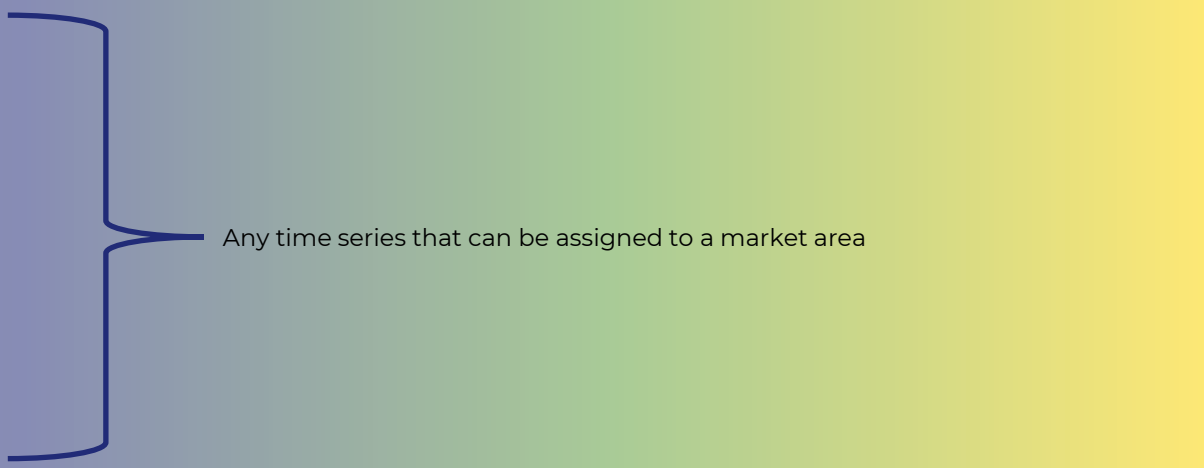

EntryExitPoint	
Arnoldstein	<ul style="list-style-type: none"> Technical Capacity En/Ex nominated in all possible qualities inc. Sums En/Ex renominated in all possible qualities inc. Sums Fulfillment of nominations Interruptions Available Capacities Booked Capacities En/Ex Allocations Physical Flow (En/Ex on the same time series) Gross Calorific Value Wobbe Yearly technical capacities Yearly booked capacities
Baumgarten	
BaumgartenCCA	
BaumgartenTAG	
BaumgartenWAG	
Ueberackern	
UeberackernABG	
UeberackernSudal	
Freilassing	
Hoechst	
Kiefersfelden	
Laa	
Lindau	
Mosonmagyarovar	
Murfeld	
Oberkappel	
Petrzalka	
Ruggell	
StorageMAB	Grid to the MAB storage facility from Pozagas/Nafta
StoragePentaWest	Grid to 7Fields storage facility (Uniper & RAG)
E/X TSO-DSO GCA	Transfer point from transmission line (TL) to distribution area (DA) at the respective TSO
E/X TSO-DSO TAG	
E/X TSO-DSO WAG	
Virtual Trading Point	Allocations at virtual trading point (VTP)

Data Publication

5 Explanation Filter MarketArea

MarketArea 
East
Tyrol
Tyrol&Vorarlberg
Vorarlberg

Any time series that can be assigned to a market area

Data Publication

5 Explanation Filter Production

Production	
Bio Production	Time series of the biomethan production
Bio Production East	
Bio Production Tyrol	
Bio Production Vorarlberg	
OMV Austria Exploration & Production	Time series of the gas production facilities
RAG Exploration & Production	

Data Publication

5 Explanation Filter Storage

Storage	
Astora	Time series of the Austrian gas storage facilities
OMV Gas Storage	
RAG Energy Storage	
Storage Facilities Austria	
Uniper Energy Storage	
Wiener Erdgasspeicher	
Storage Facilities Czech Republic	Time series of the gas storage facilities of AGSI for neighboring countries
Storage Facilities Germany	
Storage Facilities Hungary	
Storage Facilities Italy	
Storage Facilities Slovakia

Data Publication

BG-Status time series end consumer

BV – Best value principle

Data Publication

API-Token for MA data

- ▶ To retrieve the MA-Data automatically per XML-API, you can request an API-Token on the [AGGM platform](#). Complete in the form.
- ▶ After the activation of the link, credentials will be sent to you as well as an instruction on how to use the interface.

Data Publication

API credentials for private data

- ▶ When the credentials are requested from the AGGM-Account, the credentials are for a system e-mail address.
- ▶ After that, the private data can also be retrieved in addition to the MA-data. The functionality of the API will be included in the activation email.
- ▶ This system-API-user can only be applied for and assigned once per organization.
